 - take into account manufacturing, assembly and sealing techniques, types and properties of materials to be processed and legal and (energy) technical standards,
 - prepare technical work plans, sketches and drawings, plan material requirements,
 - plan, coordinate and monitor logistics concepts and construction site facilities including working and protective scaffolding,
- provide services, in particular:
 - create roof coverings, roof waterproofing and exterior wall claddings with all function-related layers, taking substructures into account,
 - planning and execution of roof drainage measures, connections and edgings
 - professional installation of materials to improve energy efficiency (thermal insulation)
 - plan, install and repair built-in parts for lighting and ventilation, snow guards, walkways and safety devices,
 - install and maintain energy collectors and energy converters on roofs and exterior walls.
 - manufacture and repair roof trusses of different types of construction,
 - apply procedures for wood preservation and wood pest control
 - carry out waterproofing of buildings and green roofs
 - plan, install, test, monitor and repair external lightning protection systems
- Checking, documenting, handing over and invoicing services, in particular:
 - perform and evaluate defect, deficiency and damage searches,
 - eliminate errors, defects and damage

In doing so, they make commercial, human resources and legally justified decisions, implement them and justify them. This includes in particular:

- plan, control and monitor work and business processes in a responsible position from an entrepreneurial perspective as well as ensure quality and sustainability,
- lead employees, enable further training and implement personnel development measures,
- qualify trainees in their craft in consideration of pedagogical and legal-organisational requirements.
