This translation has no legal status.

#### 3. PROFILE OF SKILLS AND COMPETENCES

Master craftsmen/mistresses in the building of stove and air heating trade have the professional, methodological, social and personal skills to manage and organise a building of stove and air heating trade company. In consideration of the customer requirements you can:

- develop a range of services and offer services, in particular:
  - perform calculations, in particular of the combustion and exhaust systems, combustion air supply, heating and cooling loads of buildings, and pipe dimensioning, including computer-assisted calculations,
  - create documentation, work plans, sketches and technical drawings, also by using computer-assisted systems, conduct and document technical measurements,
  - plan, install and maintain handcrafted fireplaces, in particular tiled stoves, ovens and cookers, heating systems, chimneys and heating units over two stories for solid, liquid and gaseous fuels as well as air handling units and exhaust systems on site,
- provide services, in particular:
  - plan, install and monitor systems for energy collection, conversion and storage and apply methods for rational energy use; set up and connect industrially manufactured stoves, ovens and fireplaces, apply manual and mechanical processing methods for mineral, ceramic and metallic building materials as well as assembly and joining methods and considering material properties and measures for sound insulation, fire and building protection in planning, construction and execution,
    - plan, install and commission the use of electrical, electronic, mechanical and pneumatic system, control, regulation, conveying and monitoring units; master data, diagnostic, measuring and testing systems,
  - examine, assess and document building constructions, in particular load-bearing structures, and technical building equipment systems, considering building physics, constructional, legal and ecological conditions as well as energysaving and economic aspects,
- checking, documenting, handing over and invoicing services, in particular:
  - conduct fault and malfunction detection, apply measures to eliminate faults and malfunctions, evaluate and document results.

In doing so, you make commercial, human resources and legally justified decisions, implement them and justify them. This includes in particular:

- plan, control and monitor work and business processes in a responsible position from an entrepreneurial
  perspective as well as ensure quality and sustainability,
- lead employees, enable further training and implement personnel development measures,
- qualify trainees in their craft in consideration of pedagogical and legal-organisational requirements.

### 4. RANGE OF OCCUPATIONS ACCESSIBLE TO THE HOLDER OF THE CERTIFICATE

Master craftsmen/mistresses in the building of stove and air heating trade independently manage companies or take on management tasks in companies and business premises of the building of stove and air heating trade. In craft or industrial companies, they take on in addition to providing services one or more of the following activities:

- commercial and business management,
- technical management,
- organisation of vocational training and human resources development.
